

NATURALLY ACTIVE HUMIC ACID

ENERSOL® promotes sustainable growth and optimal yield of commercial crops by adding the best-in-kind organic materials to the soil. The active ingredients, humic, fulvic and ulmic acids, acts as natural chelating agents that both improve soil's ability to provide essential nutrients improving the plant's overall health.

ENERSOL features:

- Naturally active – no harsh chemicals used in manufacturing process
- Gascoyne, North Dakota, USA Leonardite – recognized as the world's best source
- High purity – low in regulated contaminants
- Full range of humic, fulvic, and ulmic acids and humin in its natural state
- A low pH of 4.0-5.0 making it compatible with tank mixes
- Higher total Humic acids – use less product per acre

ENERSOL benefits:

- Increases plant roots; larger plants; higher yields
- Increases nutrient uptake in plants
- Promotes stronger, healthier plants
- Proven ability for a plant to withstand environmental stress such as drought
- Increased profit to growers
